Portofolio: astidhiya-1998.web.app

PROFILE

Software engineer and researcher building applied AI/ML systems, RAG pipelines, NLP recommendation engines and agentic LLM workflows. 3+ years of production Android engineering at Tokopedia. MSc in Advanced Computer Science (Merit) from the University of Sheffield on a full LPDP government scholarship. Research interests sit at the intersection of AI, digital governance and public infrastructure.

TECHNICAL SKILLS

Programming: Java, Kotlin, Python, JavaScript, SQL, Node.js

Backend & APIs: FastAPI, Flask, RESTful API & GraphQL design, Node.js, Spring Boot

Tools & Platforms: Android SDK, IntelliJ IDE, Git, Figma, Trello, Google AppScript, Microsoft Office Suite

Methodologies: MVVM/MVP/MVI-Clean Architecture, SOLID principles, Agile/Scrum, multi-layer software testing

AI / LLM Engineering: Prompt Engineering, Retrieval-Augmented Generation (RAG), LLM API Integration (OpenAI/Gemini) • Context & Token Optimisation, RAG pipelines (LangChain), Vector Databases (ChromaDB)

Data & ML: TensorFlow, scikit-learn, HuggingFace, NLP, pandas, NumPy, data analysis & evaluation

Systems & Infrastructure: GCP, Azure, Docker, CI/CD (Jenkins)

RESEARCH EXPERIENCE

Research Fellow & Co-lead | *Mata Garuda Institute — Digital Governance, Technology & Innovation*

Cluster

2025 – Present

- Co-leads a research cluster of LPDP alumni, identifying strategic digital governance issues and facilitating internal and external knowledge sharing sessions on technology policy topics.

MSc Dissertation | *University of Sheffield*

2025

Usability and Environmental Evaluation of User Authentication for Digital Government Services.

- Conducted mixed-method research evaluating how users interact with digital government authentication services across multiple platforms, conducting quantitative usability metrics to identify friction points and accessibility barriers then translated findings into a working Android implementation to validate design recommendations in practice.

2nd Place + SYMCA Award | *Data & Design Hackathon — University of Sheffield*

2025

- Designed Eco-Go: a data-driven solution for public transport accessibility across South Yorkshire, applying research and analysis to deliver evidence-based public sector recommendations under time pressure.

PROFESSIONAL EXPERIENCE

Software Engineer, Android | *Tokopedia*

2021 – 2024

- Delivered features across high-traffic platforms for millions of Indonesian users, travel, digital payments, live-streaming, and stories, collaborating closely across product, back-end, and QA teams.
- Built an automated OKR dashboard (Python + AppScript), reducing manual reporting time and improving visibility of team performance metrics.
- Managed multiple workstreams under tight deadlines, maintaining accuracy and quality in a fast-paced, complex environment.
- Conducted technical research to identify root causes of recurring platform issues and proposed solutions, demonstrating structured analytical problem-solving.

Software Engineer, Android (Intern) | DANA Indonesia

2020

- Built a new Android application from the ground up as part of a cross-functional team spanning business, product, back-end, and QA in a regulated fintech environment.

ADDITIONAL EXPERIENCE

Instructor & Mentor | Bangkit Academy by Google, GoTo, Traveloka

2022 – 2024

- Facilitated digital technology workshops for 50+ students across Indonesia, managing session logistics, and adapting content for diverse audiences.
- Mentored student teams on final projects, providing technical and user experience guidance, building skills in structured meeting support and knowledge transfer.

Speaker | GoTo DevCamp

2023

- Presented technical content to professional communities, demonstrating ability to prepare briefing materials and facilitate technical exchanges for varied audiences.

Instructor | Tokopedia Academy

2022 – 2024

- Co-developed curriculum and delivered technical workshops, managing documentation and participant learning progression across sessions.

EDUCATION

MSc Advanced Computer Science (Merit) | University of Sheffield

2024 – 2025

Full-ride LPDP scholarship (Indonesian Government). Dissertation: Usability and Environmental Evaluation of User Authentication for Digital Government Services.

S.Kom — Informatics Engineering (GPA: 3.66/4.00) | Universitas Brawijaya

2016 – 2020

Specialised in multimedia, mobile and games development.
