

Asti Dhiya Anzaria

Banjarmasin, Indonesia · +62 xx · astidhiyaanzaria@gmail.com · [linkedin.com/in/astidhiyaa](https://www.linkedin.com/in/astidhiyaa) · github.com/roboast · astidhiya-1998.web.app

PROFILE

AI Engineer with 3+ years of experience building scalable, production-grade systems at Tokopedia, now specialising in LLM-powered applications and Retrieval Augmented Generation (RAG). Pivoting from Android to AI engineering, combining strong software engineering fundamentals with end-to-end AI pipeline design (embedding systems, vector search and LLM orchestration). Passionate about building reliable, user-centric AI systems backed by a strong foundation in usability research and system evaluation.

TECHNICAL SKILLS

Programming	Python, Kotlin, JavaScript, SQL, Java, Node.js
AI / LLM	Prompt Engineering, RAG pipelines (LangChain, LangGraph), LLM API Integration (OpenAI, Gemini), Context & Token Optimisation, LLM orchestration pipelines, Fine-tuning
ML & NLP	TensorFlow, scikit-learn, HuggingFace Transformers, CLIP, BERT, MiniLM, Sentence Transformers, pandas, NumPy, RAG evaluation
Vector DBs	ChromaDB, Pinecone
Backend & APIs	FastAPI, Flask, RESTful API & GraphQL, Spring Boot
Cloud & DevOps	GCP, AWS, Azure, Docker, CI/CD (Jenkins)
Tools	Git, Figma, Google AppScript

PROJECTS

Asian Drama Persona Matcher — huggingface.co/spaces/roboast/asian-drama-persona-ig	2026
- Developed a cross-modal recommendation engine using CLIP (ViT-B/32) to match user photos to Asian drama personas via cosine similarity over drama metadata embeddings - Engineered a LangChain + Gemini pipeline for aesthetic, contextualised drama recommendations with AI-generated reveals - Deployed as a Gradio prototype enabling real-time image-to-drama matching	
Mood-based Food Recommendation in London — huggingface.co/spaces/roboast/moody-ldn-food	2026
- Built a hybrid recommendation engine combining DistilRoBERTa emotion detection and Sentence Transformers with Pinecone vector database for mood-adaptive food discovery - Designed a 60:40 mood-semantic weighted search strategy over restaurant metadata, integrating Gemini LLM for empathetic, personalised conversational responses - Deployed end-to-end Gradio pipeline with real-time inference, vector similarity search and AI-generated suggestions	

PROFESSIONAL EXPERIENCE

Tokopedia Software Engineer — Android	2021 – 2024
Jakarta, Indonesia	
- Shipped production features across live-streaming, digital payments, and travel platforms serving 15M+ active users, maintaining high availability in a distributed microservices environment - Built an automated OKR tracking dashboard in Python and Google AppScript, eliminating ~4 hours/week of manual reporting and increasing OKR visibility from monthly to real-time	

- Resolved recurring platform stability issues through structured data analysis and debugging, measurably reducing failure recurrence across high-traffic payment and booking flows
- Applied MVVM-MVI and Clean Architecture across feature modules, enabling parallel team delivery and reducing regression risk during rapid release cycles
- Collaborated cross-functionally with backend, product, and QA teams to deliver 10+ features within sprint timelines

DANA Indonesia | Software Engineer — Android (Intern)

2020

Jakarta, Indonesia

- Built a new Android application end-to-end within a regulated fintech environment, collaborating across business, backend, product and QA teams to deliver a functional MVP within the internship period
- Implemented core UI flows and integrated REST APIs in Kotlin, following secure coding practices required for financial services compliance

ADDITIONAL EXPERIENCE

Mata Garuda Institute | Research Fellow & Co-lead — Digital Governance, Technology & Innovation

2025 – Present

Co-leads a research cluster of LPDP alumni, producing policy analysis on digital governance and facilitating knowledge-sharing sessions on technology policy for internal and external audiences

Bangkit Academy (Google, GoTo, Traveloka) | Instructor & Mentor

2022 – 2024

Facilitated mobile development workshops for 50+ students across Indonesia; mentored final project teams on technical architecture and UX design

GoTo DevCamp | Speaker & Instructor

2024

Delivered technical sessions on Android architecture and mobile engineering to professional and student communities; co-developed curriculum and managed participant learning progression

EDUCATION

University of Sheffield | MSc Advanced Computer Science — Merit

2024 – 2025

Sheffield, United Kingdom

- Full-ride LPDP Government Scholarship
- Dissertation: Usability and Environmental Evaluation of User Authentication for Digital Government Services — analysed existing digital government authentication systems and designed, implemented, and evaluated NFC and QR-based passwordless authentication solutions, developing Android prototypes and performing comparative usability (SUS), heuristic and energy consumption analysis to benchmark improvements over current approaches

Universitas Brawijaya | S.Kom — Informatics Engineering | GPA: 3.66 / 4.00

2016 – 2020

Malang, Indonesia

Specialisation in multimedia, mobile, and game development

AWARDS

2nd Place + SYMCA Award · Data & Design Hackathon, University of Sheffield · 2025

Eco-Go: a data-driven public transport accessibility solution for South Yorkshire, delivering evidence-based recommendations.
